SIO-SAFE™
 EXTRA LIGHT

Hi-vis jacket with ARC protection

The Ingon is a practical jacket with 2 radio loops, 4 pockets on the outside and 1 on the inside. The jacket is made from an inherently flame retardant fabric and offers excellent protection against severe body burns caused by the exposure to an electric arc or other industrial heat and flame hazards. The jacket complies to the EN ISO 20471 standard, class 3, for high visibility clothing. The fluorescent orange colour and the retro-reflective material make that the jacket also complies to RIS-3279-TOM. This is a high visibility standard that applies to the rail industry in the UK and wants to improve the visibility of people on or near the rail line.
