Bib & brace with ARC protection

The Grimma is a practical bib and brace with many pockets in a supple and inherently flame retardant fabric. It is the perfect garment when working in a multi-risk environment as it protects you against multiple hazards. The bib and brace is ideal to wear when welding as it protects the wearer against small splashes of molten metal, heat, flames and radiant heat from an electric arc. Thanks to the retroreflective material encircling the leg ends the wearers visibility is also enhanced at dark light conditions.
