## Hi-vis sustainable rain jacket with ARC protection (APC 2)

This high visibility rain jacket serves two purposes. First, it protects you from many industrial hazards such as chemical liquids, heat and flames and offers arc protection class 2. Besides multinorm protection, the jacket also has a sustainable purpose: to reduce its impact on the environment. Small changes like reducing the weight of the fabrics, changing the composition or paying attention to the design so the jacket is easier to take apart can have a big impact on the environment. Doing your bit for the environment while staying well protected is possible with the Blaxton.
