Hood with ARC protection (APC 2)

When you have to work in environments where there is a risk of an electrical flashover you need good protection. For this kind of protection you think of a jacket and a trousers. But what if it's raining or very windy and you want to shield your head? You cannot wear an ordinary cap! Your head needs the same level of protection like the rest of your body. Therefore we developed the Tigas hood which offers ARC class 2 protection. This rain hood offers protection against heat, flames, liquid chemicals and offers also protection in welding situations. In short, this hood is the perfect addition to the 7530A2ET2 Talsi ARC rain jacket.
