## ECO work trousers with ARC protection (APC1)

These multinorm knee pocket trousers with stitched on retroreflective stripes offer enhanced visibility for medium risk situations. Thanks to the use of high performing flame resistant modacrylic fibres this garment also ensures robust resistance against electric arc flashover. For tasks that include working on the knees, knee pads can be placed in the knee pockets for additional protection and comfort. The Barnard work trousers are the UP-dated version of the Rumes (080V).
